PROFILE

"I am an aspiring junior front-end software developer. For the last three years I have been working as an integrated circuits (IC) designer, but my true passion is programming and creating something tangible, which is why I recently completed a super intensive programming course. Over 4.5 months of intensive training 8 hours a day, I gained basic knowledge as a full stack developer, and had the chance to work on concrete projects using different frameworks including Django and Vue.js. In addition to the programming skills, the training enabled me to refine my teamwork and time management skills thanks to the work conditions mirroring those of professional settings. I am keen to put my skills and knowledge to practice as a front-end software developer."

EDUCATION

Slovak University of Technology in Bratislava

2015-2017

Faculty of Electrical Engineering and Computer Science

MA degree: Electronics and Photonics

Slovak University of Technology in Bratislava

2011-2015

Faculty of Civil Engineering

BSc degree: Geodesy, Cartography and Cadastre

COURSES

03-08/2022 | Junior Developer Course in Green Fox Academy

03-06/2021 | Python course for beginners, PyLadies Prague

SOFT SKILLS

Time management	85%
Communication	75%
Self-motivation	80%
Teamwork	85%
Creativity	88%

HOBBIES

- Dancing-Bachata
- Physical training
- Travelling
- Swimming
- Reading

CERTIFICATES

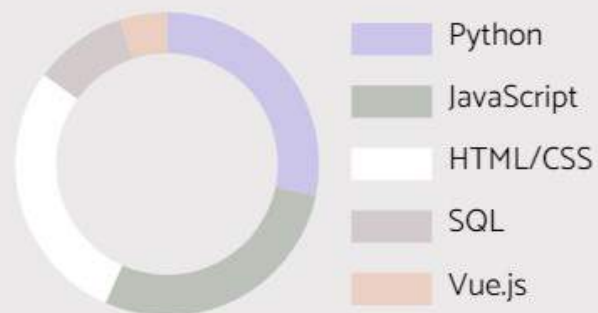

Junior programmer of www applications

08/2022 | Green Fox Academy, Prague

First Certificate in English, B2 level

11/2021 | Cambridge English Language Assessment

SOFTWARE SKILLS

WORK EXPERIENCE

"I started my career in the company Adesto Technologies, which is a leading provider of innovative application-specific semiconductors and systems for the IoT era. While I was working there, this company was taken over twice by other companies. I was part of a mixed and RF design team that has been developing world-class IP for use in our custom ASICs and for licensing to customers that develop their own design. My responsibilities was verifying the viability of different designs and designing layout of IC."

Renesas Electronics, Prague

09/2021 - 03/2022

Analog Design Engineer

Dialog Semiconductor, Prague

07/2020 - 08/2021

Analog Design Engineer

Adesto Technologies, Prague

07/2018 - 07/2020

Analog Design Engineer
